DETAILED ACTION

Allowable Subject Matter

1. Claim 1, 2, 5-8, 11, and 47 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Okuyama (USPN 5,987,126) discloses a transmitter for selectively transmitting content signals to a receiver including a means for processing a content signal for copy protection (column 9 lines 37-46), logic means for determining by authentication whether the connected receiver is operable to function in accordance with copyright protection encryption technology (column 19 lines 45-65), and transmission controlling means for holding information indicating those receivers that are not enabled to copy content by using either the content signal or the copy protected processed signal (column 10 lines 7-11) and for controlling the signal transmitted by the transmitter according to whether or not information indicating the connected receiver is included in the held information such that a non-copy protected signal is transmitted if the connected receiver is not enabled to copy content (column 10 lines 11-18) and monitoring for changes in the network to not send information to disconnected receivers (column 27 lines 63-65). Okuyama does not disclose switching to send a copy protected signal if the monitored device's configuration is changed. This limitation is not seen as obvious, since in Okuyama, the changed device is removed, and would not be sent any signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2134

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
